HOW TO GET THE MOST OUT OF HOOFFLEX® MAGIC CUSHION®

STEP 1

Thoroughly clean all areas of the hoof using a hoof pick, and if necessary, a stiff or wire brush. Magic Cushion® must come in direct contact with the sole to be effective.

STEP 2

Using gloves or an applicator, apply an amount of hoof packing to the sole sufficient enough to cover the entire sole and sulci of the frog ½ inch in depth.

STEP 3

If your horse has shoes on, put his foot down in sawdust to keep the hoof packing in place and to allow the liquid ingredients to be absorbed into the sole. If your horse is barefoot, you need to wrap the hoof to keep the hoof packing in place. Replace every 24-48 hours.

Magic Cushion® can also be packed under a pad for the duration of the shoeing cycle. Ask your farrier!
